HOME COLLECTION

## PRODUCT CARE

### TEXTILES

Care for textiles by vacuuming or lightly brushing (please note that certain upholstered items should not be vacuumed to prevent the stuffing from coming through).

Maintain textiles by keeping them away from direct sunlight. Rotate and flip cushions for even wear.

The nap of high pile textiles such as velvets may become crushed or lose its original pile height. We recommend light steaming to lift the pile to its original height. The textile should also be brushed with a de-linting brush to maintain its pile.

Water based or solvent cleaner may cause discoloration or staining.

We recommend that stained or soiled textiles be professionally cleaned.

### WOOD & LACQUER FINISHES

Dust regularly with a soft cloth

Maintain wood and lacquer by not placing near heaters and air conditioning units to prevent over-drying to exposure to excessive moisture.

Avoid extreme humidity changes in your home, as extremely dry air can cause wood to crack and lacquer to lift.

Do not place/leave hot or moist objects directly on the wood. Rubber or plastic left on the wood finish can also damage the finish.

Clean Wood Finishes by using a dry or slightly dampened (with Naptha & Lukewarm water) 100% Cotton Flannel Cloth.

Clean Lacquer Finishes by using a dry or slightly dampened (with Ivory Liquid) 100% Cotton Cloth.

Do not use commercial or heavy duty polishes or waxes, as they can yellow light finishes.

We recommend that stained or soiled wood or lacquer pieces be professionally cleaned or refinished.

### GLASS & CRYSTAL

Glass and Crystal can be cleaned by wiping with a soft damp cloth or glass cleaner with no additives. Apply glass cleaner to a soft cloth rather than directly on to the fixture to avoid overspray that may damage other finishes.

### ALL MATERIALS

For any product that is heavily damaged or excessively worn, seek professional assistance.
